Vaishnav P M

Full Stack Developer | Next.js | Node.js | TypeScript | PostgreSQL

Bengaluru | 7012304131 | vaishnavpm107@gmail.com| linkedin.com/in/vaishnavpm

Professional Summary

Full Stack Developer with 3+ years of experience building and supporting production SaaS applications using Next.js, React, TypeScript, Node.js, NestJS, Express.js, PostgreSQL, Redis, REST APIs, cloud services, and CI/CD. Experienced developing modular frontend and backend systems, relational data workflows, authentication, role-based access control, input validation, multi-tenant product features, asynchronous processing, third-party integrations, and production support. Strong in secure API design, reusable components, debugging, performance optimization, technical documentation, Agile delivery, and translating phased business requirements into shippable features.

Technical Skills

Frontend: Next.js, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Bootstrap, Redux, Context API, React Query/TanStack Query, Axios, Vite, SSR, SSG, responsive design, reusable components

Backend: Node.js, NestJS, Express.js, REST APIs, modular architecture, microservices, middleware, Swagger/OpenAPI, request validation, WebSockets/Socket.IO, asynchronous processing, Redis queues

Data: PostgreSQL, MySQL, MongoDB, Redis, SQL, relational schema design, data modelling, joins, query optimization, stored procedures, caching, secure data access

Security: JWT, OAuth, RBAC, token-based authorization, input validation, API security, authentication workflows, Firebase Authentication, secure third-party integrations

Cloud and DevOps: AWS, S3, Microsoft Azure, Azure App Service, Azure DevOps CI/CD, Docker, Serverless Framework, Git, GitHub, Bitbucket, Postman, VS Code

Engineering Practices: Agile/Scrum, code reviews, technical documentation, debugging, root-cause analysis, performance tuning, clean code, reusable components, production support

Experience

Software Engineer – Enfin Technologies
November 2024 – June 2026| Trivandrum, Kerala

- Delivered 30+ production modules across 12 release cycles for a multi-tenant marketing research SaaS platform using Next.js, React, TypeScript, Node.js, NestJS, PostgreSQL, Redis, and REST APIs.
- Built responsive Next.js interfaces and reusable TypeScript components for meetings, calendars, discussion guides, polls, takeaways, research workflows, reporting, and AI-enabled features.
- Developed modular Node.js/NestJS services and documented 60+ REST API endpoints using Swagger/OpenAPI, supporting shared business workflows across multiple customer organisations.
- Implemented PostgreSQL-backed business logic, JWT authentication, RBAC, middleware, request validation, secure API access, and Redis-backed queues for long-running asynchronous operations.
- Contributed to multi-tenant workflows involving shared modules, role-based access, customer-specific requirements, and connected user journeys. (Keep only if this accurately reflects your work.)
- Integrated third-party video, streaming, and AI services and connected backend processing with user-facing application workflows.
- Improved application performance by approximately 25%/200 ms by reducing repeated API requests through React Query caching and invalidation and optimizing the Vite production bundle.
- Troubleshot and resolved 20+ API, integration, workflow, UI, and cross-browser defects through structured debugging and root-cause analysis.
- Participated in sprint planning, code reviews, CI/CD releases, technical documentation, and collaboration with Product, Design, QA, and backend teams.

Full Stack Developer – Bairuha Tech
August 2023 – November 2024 | Calicut, Kerala

- Built and shipped 4+ production web applications using React, Next.js, Node.js/Express, PostgreSQL, REST APIs, JavaScript, and TypeScript, including event, ticketing, e-commerce, and CRM products.
- Delivered complete feature flows across frontend components, backend business logic, authentication, database operations, third-party integrations, deployment, and production support.
- Built reusable React components with Tailwind CSS and shadcn/ui for an event platform supporting 10+ events and 1,000+ tickets processed.
- Implemented authentication and API workflows using Firebase Authentication, token-based access, validation, and secure frontend-backend integration.
- Reduced deployment time from 30 minutes to 10 minutes by setting up Azure DevOps CI/CD pipelines for automated build, test, and deployment.
- Resolved 50+ production incidents through debugging, root-cause analysis, performance investigation, and infrastructure coordination.
- Shipped 10+ React Native releases and mentored 3+ interns through code reviews, pairing sessions, and production delivery support.

Information Technology Support Engineer – CMS IT Services
March 2020 – May 2021 | Kochi, Kerala

- Resolved L2 application, network and server incidents for enterprise environments, measured by 95% closure within SLA, by triaging tickets and coordinating with infrastructure teams.

Key Projects

Marketing Research SaaS Platform

- Delivered Next.js and React features for meetings, research workflows, reporting, polls, takeaways, and AI-enabled analysis.
- Implemented REST API integrations, role-based access, PostgreSQL workflows, Redis queues, cached state, and asynchronous result handling.
- Worked across connected modules and customer-specific workflows in a shared SaaS codebase.

Enterprise Ticketing and Asset Management Platform

- Contributed to NestJS backend development for a CRM and ticketing platform used by multiple enterprise teams.
- Built dynamic form configuration features and REST APIs for ticket creation, retrieval, and workflow management.
- Integrated LDAP authentication and Google OAuth for secure multi-method login.

Commerce Platforms (NextME / Rockana)

- Built shopping, construction-materials, travel CRM, and staff-booking features using React, NestJS, PostgreSQL, Oracle, and React Native.
- Developed dashboards, pricing modules, authentication workflows, booking features, and backend integrations.

Travel CRM and Kenya Airways Staff Booking Portal

- Developed itinerary management, client communication, and travel operations features for a Travel CRM.
- Built staff flight-booking features using React.js, NestJS, Oracle, and a flight-booking engine integration.
- Improved scheduling, booking workflows by integrating frontend screens with backend services and booking APIs.

Education

Bachelor of Technology, Electronics and Communication Engineering
APJ Abdul Kalam Technological University (KTU), Vimal Jyothi Engineering College

Certifications

- Web Development Fundamentals
- Claude with Google Cloud's Vertex AI
- Model Context Protocol: Advanced Topics
- AI Literacy
